Article Numbers: 132924, 132923, 132922, 132921

Safety Instructions:

- Take care when handling fresh and used oil as it is flammable. Suitable for storing fresh and used oil - Check for leaks before use.
- The drip tray must be checked regularly for leaks.
- There is a risk of environmental damage and danger from heat radiation or fire if handled incorrectly.
- Only use in areas with adequate ventilation.
- Read the operating instructions thoroughly before use.
- The product must not be placed near sources of ignition. Avoid contact with naked flames or hot surfaces.
- Carry out regular safety checks in accordance with the regulations. Regular inspection required every 2½ years.
- Not suitable for the storage of substances with a flash point below 55°C. Attention: Highly flammable liquid - storage only at temperatures below the flash point of 55°C. Observe flash point of the oil, minimum flash point > 55°C.
- Ensure that the tank is stable and not unstable. Ensure stability due to the low centre of gravity.
- Observe instructions for use in water protection areas. When used in water protection areas, observe local regulations.
- Transport only with authorised authorities, comply with ADR regulations. For transport with ADR regulations, ensure that no pump is installed. Only suitable for transport in accordance with ADR, no pump installed.
- Provide safety data sheets for the stored substances.
- Forklift trucks or pallet trucks may only drive underneath on the pallet provided.
- Ensure safe handling and storage to prevent oil leakage.
- Take immediate action in the event of leaks.
