Safety Instructions:

- For the transport and storage of heavy loads, please note the load capacity of up to 30 kg per Euro Box.
- Take care not to load the Euro Box above the recommended weight to avoid instability and damage.
- Avoid extreme temperatures above 100 °C or below -20 °C in order not to jeopardise the structural integrity of the material.
- The Euro Box should only be used in aggressive chemical environments after consultation with the manufacturer.
- For the safe transport of liquids or hazardous substances, observe the relevant regulations and use suitable containers.
- The ergonomics of the grips should be observed during heavy transport in order to avoid injuries.
- The box is stackable; make sure that the top of the bottom box is not loaded during stacking.
