

Product Safety Information

Steel sump tray with castors+handle, 800 x 800 mm

Please note the technical data of the products!

Article Numbers: 134945, 134944, 133058, 133057, 133056, 133055

Safety Instructions:

- Risk of suffocation due to improper use or storage of liquids.
- Risk of slipping accidents on slippery floors if liquids leak out.
- Ensure that the tray is not overloaded; observe the maximum weight.
- Store only in suitable environments in accordance with the manufacturer's specifications.
- Use the tray in well-ventilated rooms to minimise the risk of gaseous substances; ventilate the area well.
- Only store flammable liquids in closed containers; take care during storage.
- Protect the drip tray from direct sunlight.
- Observe the maximum capacity; do not overfill.
- Check the drip tray regularly for leaks and damage.
- Ensure compatibility of the materials with the liquids.
- Observe safety data sheet.
- Wear personal protective equipment when handling liquids.
- Product is suitable for the storage of flammable liquids and liquids hazardous to water; observe fire and environmental hazards according to GHS categories.
- Protective measures required in case of improper handling.
- Ensure that the drip tray is placed on a stable, level surface.
- Do not overfill the drums to avoid overflows.
- Only use products for their intended purpose.
- Read the operating instructions and safety instructions carefully before using the drip tray.
- Only use the drip tray for authorised liquids in accordance with the declaration of conformity.
- Use suitable lifting and carrying techniques during transport to avoid injury.
- For lighter drums (60 litre drums and small containers), ensure correct positioning to prevent overturning.
- Risk of injury due to improper use of the castors and push handle.
- Recommended use only for appropriate liquids and drums.
