Safety Instructions:

- Ensure that the transport trolley is used on a stable, level surface and secure if the terrain is uneven.
- Keep the trolley on level ground and avoid abrupt stops to prevent it from tipping over.
- Regularly check the condition and functionality of the castors, axles and steering mechanisms to minimise safety risks.
- Ensure that the transport trolley is not overloaded
- observe the maximum load capacity to avoid damage and injury.
- Keep children and pets away and ensure that no unauthorised persons are in the vicinity to avoid injury.
- Wear suitable personal protective equipment when handling and especially when the trolley is used in potentially hazardous environments.
- In the event of recognisable damage or unusual noises, consult a specialist immediately and discontinue use.
- Do not store the product in overheated or humid environments.
- Secure loose objects during transport.
- Avoid jerky movements when pushing or pulling to prevent falls.
- Use the product in accordance with safety standard DIN EN 1757-3.
- Not suitable for the transport of hazardous substances unless designed for this purpose.
- Do not leave people standing on the transport trolley.
