

Product Safety Information

Transport trolley made of light metal, with hinged lid

Please note the technical data of the products!

Article Numbers: 150545, 150543, 150542, 150541, 150540, 150539

Safety Instructions:

- Read the operating instructions carefully before first use and always follow them.
- Distribute heavy loads evenly and do not exceed the maximum load capacity to avoid tipping and loss of control.
- Ensure safety when using on a stable and level surface.
- Regularly check the castors and other parts such as the hinged cover to ensure they are in perfect condition and replace if necessary.
- Beware of slippery, uneven or extreme temperatures, castors are not suitable for outdoor use in extreme temperatures.
- Protect against the risk of crushing, take special care when handling to minimise the risk of injury.
- Ensure that the transport trolley is used in accordance with safety standard DIN EN 1757-3.
- Only suitable for commercial use and keep the product away from children.
- Ensure stability when loading and unloading the trolley, prevent unintentional rolling with swivel castor mechanisms.
- Take care when pushing or pulling the trolley to prevent it from tipping over.
- Use suitable techniques to secure the load during transport.
- Always use the product as intended.
