Article Numbers: 94068, 94067, 92920

Safety Instructions:

- The box is not suitable for storing or transporting food.
- Use only in the specified temperature range of -20°C to +100°C, as the structure may be impaired in extreme cold or heat.
- When stacking the boxes, ensure that the recommended maximum load of 600 kg is not exceeded in order to ensure stability and prevent breakage.
- Ensure safe handling of the through-hole handle, as it can break if excessive pressure is applied.
- When processing with chemical substances, the chemical resistance of the box should be checked. Risk of undesirable reactions with substances not listed in the product data sheet.
- Take the utmost care when stacking to avoid injury or damage.
- Before cleaning, ensure that all residues have been removed to avoid skin and respiratory irritation. Chemical cleaning agents that could jeopardise the integrity of the material should be avoided.
- The box is resistant to most oils, acids and alkalis, but hazardous chemicals should be kept away from direct contact.
- If handled incorrectly, the box can be heavy and cause injury.
