Safety Instructions:

- The partition wall must be secured with feet at the beginning and end to ensure stability.
- Install hinges and fasteners according to instructions to ensure stability and safety.
- Regular inspections of the construction, connections and surfaces for safety and to prevent damage.
- Carefully read and follow the user instructions; ensure correct installation according to the instructions.
- Only use indoors and keep away from moisture to avoid material damage.
- The product must not be pulled or pushed by the partition wall elements in order to avoid damage.
- Do not overload shelves to ensure stability and safety.
- Avoid using sharp objects on the surface to prevent damage.
- Ensure that the partition wall is stable and use the necessary feet to prevent it from toppling over.
- Do not use if there is visible damage and contact customer service.
- During assembly, ensure that all connections (hinges, feet) are correctly fitted and not damaged.
- Ensure that the hinges are fitted correctly to avoid the risk of crushing.
- Use only under supervision for children; no sharp edges accessible for safety especially of small children under 3 years.
- Maintain sound absorption coefficient through proper use; pay attention to sound absorption class A for optimum use in noisy environments.
- Check for damage and missing parts before use to rule out safety risks.
- Ensure sufficient stability and correct connecting elements to prevent tipping or falling over.
