Article Numbers: 99031, 138731, 99034

Safety Instructions:

- Stacking hazard: Ensure that the box is stacked properly and is not heavily loaded to prevent it from tipping over.
- High load capacity of up to 450 kg: Do not overload and do not exceed the maximum load capacity to avoid structural damage and the risk of falling.
- Temperature resistant: Only use within the temperature range of -40°C to +60°C to avoid material damage.
- Acid resistance: Handle aggressive chemicals with care to ensure the integrity of the box and ensure that the box is tightly sealed when liquids are present.
- Suitable undercarriage: Ensure that pallet trucks and forklift trucks are positioned and used correctly to avoid accidents.
- Transport and storage: Secure the box with suitable means during transport and follow the storage instructions to prevent damage and tipping over.
- Holding and carrying measures: When handling the box, take protective measures to avoid injury and ensure that the box is placed on a suitable surface.
- Only use the box for its intended purpose and keep children away from it.
