Article Numbers: 77976, 77975, 77974, 77973, 77972, 77971, 77970, 77969

Safety Instructions:

- Warning of fire hazard from the ashtray in the waste bin; empty regularly to avoid overfilling.
- Place the waste bin on a stable, level surface and ensure that it is securely anchored, especially in strong winds, to prevent it from tipping over and endangering pedestrians.
- Avoid overfilling the waste bin with flammable materials or placing it near sources of heat.
- Use suitable methods during transport to avoid injuries caused by the weight of approx. 22 kg.
- Regular maintenance, cleaning and inspection of the product, including checking for rust and damage to the powder coating to ensure safety.
- Keep the waste bin away from children and sharp objects to avoid injury.
- Ensure that the waste bin is not overheated or used in extreme weather conditions in order to preserve the functionality of the powder coating.
- Ensure safe use only for the intended purpose and prohibit the disposal of hazardous waste.
- Make sure that no liquids get into the waste bin to prevent corrosion.
- Follow the instructions for safe disposal of cigarettes in the ashtray to avoid the risk of fire.
- Comply with regional regulations on waste disposal.
- Provide clear instructions and suitable storage and transport conditions so as not to jeopardise safety.
