Safety Instructions:

- Not suitable for children, risk of choking if small parts are swallowed; the product should be kept out of the reach of children.
- Use only recommended for commercial purposes, improper handling can lead to injuries.
- Ensure that the loads are within the specified load capacity (350 kg) to avoid breakage and that the maximum tensile strength of 350 kg is not exceeded.
- Wear safety goggles and gloves when handling the strapping to prevent injuries and to protect yourself from the risk of cuts.
- Avoid contact between the strapping and sharp objects or edges to prevent damage and injury.
- Before use, ensure that the strapping is in perfect condition to minimise safety risks.
- Take care when using PET polyester strapping, as improper use can lead to injuries.
- Not suitable for use in food contact applications unless specifically stated.
- This product is only suitable for the intended use of bundling and strapping heavy objects.
