Safety Instructions:

- No small parts that could cause a choking hazard.
- Ensure that doors and sliding doors are properly closed and can move freely to prevent injuries and crushing.
- Include safety instructions and assembly instructions in an understandable language.
- Regularly check the functionality of locking mechanisms and mechanical parts.
- Do not use in the event of poor installation or damage; if the product is damaged, show it to a specialist.
- Use suitable tools and protective clothing during installation. Carry out installation in accordance with the instructions on a stable, level surface for safety and stability.
- Secure all parts properly to prevent the cupboard from falling and tipping over. Fix the back of the cabinet to the wall.
- Avoid overloading the shelves and using them for their intended purpose to prevent them from tipping over.
- Keep small parts and accessories away from children to minimise the risk of suffocation.
- Keep the product away from moisture and direct heat to prevent material damage.
- To avoid injury, do not allow children to interact with the product unsupervised.
- Locker should only be accessible to adults.
- Observe specific safety precautions for hazardous substances.
- If necessary, regularly check acoustic fronts and push cylinder lock for function and avoid damage.
- Avoid aggressive cleaning agents on surface coatings.
