Safety Instructions:

- Install at a safe height of approx. 2000 mm to prevent injuries. Before installation, check the wall structure to ensure that it can bear the weight and load of the wall parker.
- Use suitable dowels and screws for fastening (not included in the scope of delivery).
- Maintain a distance of at least 650 mm between several mounted wall parkers for safe use.
- Suspension bends are rounded on all sides, but be careful when handling the product to minimise the risk of injury.
- Observe the maximum tyre width of 55 mm to avoid damage.
- Only use the product for its intended purpose in order to avoid injuries caused by misuse.
