Safety Instructions:

- Before mounting, make sure that the wall bracket is stable and can support the weight of the bike.
- When mounting at the recommended height of approx. 2000 mm, ensure that the wall-mounted bike rack is mounted at a safe angle.
- Observe the maximum recommended tyre width of 55 mm to avoid stability problems.
- The suspension bends are rounded on all sides to minimise the risk of injury.
- The use of suitable dowels and screws is required for mounting to ensure secure fastening.
