Article Numbers: 93794, 93793, 93792, 93791, 93790

Safety Instructions:

- Only use the product on a stable and flat surface. Avoid ramps or slopes to prevent the product from tipping over.
- Observe the maximum load capacity to avoid the risk of falling. Avoid overloading beyond the permissible weight of 10 kg. The assembly step may only be used by a single person.
- Check for mechanical damage before use. Keep the step clean and check regularly for wear or damage.
- Ensure that the steps are fully engaged and that they are set up and used correctly.
- Observe the labels and warnings during use.
- Not recommended for use by children or people who cannot climb safely.
- Do not allow children to play or climb on the assembly step unsupervised. Do not allow children access to the product.
- Avoid using the assembly step near open windows or other hazards.
- When in use, the assembly step should not rise above the maximum step height.
- Label the maximum load capacity of the mounting step according to the product information.
- Keep the safety area around the product clear.
