Safety Instructions:

- Beware of crushing hazard when operating the pallet truck.
- Check the overload valve regularly to avoid overloading.
- Wear protective clothing, including safety shoes, to prevent injuries when lifting or moving loads.
- Only operate with the intended loads and do not exceed the maximum load capacity in order to minimise risks.
- Only raise and lower the forks in the operating position.
- Ensure suitable surfaces and make sure that the floor is level and stable before use to ensure stability and prevent accidents.
- Users should be trained to operate the pallet truck safely and handle the available load correctly.
- Safe use instructions and safety information should be provided in a language understandable to the user.
- Avoid using the pallet truck in poor visibility or adverse weather conditions.
- Ensure regular maintenance of the appliance in accordance with the manufacturer's instructions.
