Safety Instructions:

- Before use, ensure that the pallet truck is suitable for the intended weight.
- Take appropriate safety precautions to avoid injury when lifting or moving loads.
- Ensure that the swivel castors and load rollers are free from contamination to ensure safe use.
- Do not load the pallet truck beyond the recommended load capacity of 2500 kg. Operate only by qualified personnel.
- Follow the instructions for correct use and maintenance of the pallet truck.
- There is a risk of falling or crushing if used incorrectly.
- Only use on stable, level surfaces to prevent tipping.
- Choking hazard: Keep small parts and tools away from children.
- Ensure that the hydraulic unit is serviced regularly to prevent leaks and malfunctions.
- Observe the minimum distance from other persons during operation.
- Read the safety instructions carefully before first use.
- Regularly check the condition of the pallet truck, especially the castors and the hydraulic unit.
- Operate with both hands and in an upright position.
- Pay attention to other people in the vicinity during operation.
- Wear suitable protective clothing, including safety shoes.
- If there are any abnormalities such as noises or leaks, stop operation immediately.
- Keep the pallet truck away from sources of ignition and heat.
