Safety Instructions:

- Use only by trained personnel.
- Check the hydraulic unit for damage before use.
- Maintain a safe distance from other persons during operation.
- Do not exceed the specified load capacity of 2500 kg to avoid the risk of mechanical failure.
- Use the pallet truck on a stable surface to prevent it from tipping over.
- Always ensure that the forks are positioned correctly.
- Only use original spare parts for repairs.
- Read the operating instructions before use and follow the safety instructions.
- Wear gloves to avoid injury from sharp edges or moving parts.
- Ensure that there are no persons under the lifted loads.
- If there are any signs of damage or leaks, take the appliance out of operation immediately and have it checked by a specialist.
- Risk of injury due to crushing when lifting or lowering loads.
- The use of the pallet truck by children is prohibited.
