Safety Instructions:

- Choking hazard due to breakable glass, small parts or accessories.
- Observe the safety instructions for handling the sliding doors, in particular lock the hinged doors properly to prevent unauthorised access.
- Avoid tipping the cabinet over: Do not overload, set up on a level surface and check stability after assembly.
- Note on risk of injury: Take care when transporting heavy products and only allow children access under supervision.
- Correct securing: Follow the instructions for adjustable glass shelves and check their stability regularly.
- Beware of sharp edges on glass and aluminium profiles and avoid damaging the toughened safety glass with sharp objects.
- Lighting: Perform safety checks before use; install power supply properly to minimise risk of electric shock.
- Avoid overloading the display case; observe the maximum load values of the glass shelves.
- Protect the display case from direct sunlight to prevent damage to exhibits.
