Article Numbers: 95781, 95774, 95772

Safety Instructions:

- Ensure that the table top is stable and securely mounted to prevent tipping and ensure stability.
- When adjusting the height of the table, ensure that no parts of the body are trapped and keep the Allen key in a safe place to prevent accidental adjustment.
- Do not exceed the maximum load capacity of the table to avoid structural damage or injury. Maximum load value: 250 kg.
- When used in ESD areas, take suitable ESD protection measures and ensure that the tabletop made of ESD material is used safely.
- Regularly inspect the screw connections to prevent loosening or damage.
- Before using the table, set the correct working height to avoid injuries and fatigue.
- Check the stability of the table, especially with heavy loads (up to 250 kg).
- Warnings about the load limit and height should be clearly visible on the surface or in the operating instructions.
- Only adjust the working height in accordance with the instructions in order to avoid injuries.
- For safe use, observe workplace conditions to avoid signs of fatigue.
