

# Product Safety Information

## Steel sump tray with grating, 1800 x 800 mm

Please note the technical data of the products!

**Article Numbers:** 134873, 134872, 133038, 133037, 133036, 133035

### Safety Instructions:

- Observe storage of flammable liquids according to GHS categories 1-3.
- Avoid contact with liquids hazardous to water of GHS categories 1-4.
- Place the drip tray on a stable and level surface to prevent it from tipping over.
- Use only for intended drums (max. 3 x 200 litres) and small containers.
- Regularly check the load-bearing capacity of the grating (1000 kg/m<sup>2</sup>) and the drip tray for damage.
- Wear protective equipment such as gloves and safety goggles when handling hazardous substances and when emptying.
- Do not exceed the maximum load of the drip tray (3 drums or 202 litres).
- Take care with sharp edges or surfaces of the products.
- Not suitable for food storage.
- Protect from direct sunlight and extreme weather conditions.
- Risk of flammability if the liquids are stored improperly.
- Observe safety data sheets and manufacturer's instructions.
- Increased risk of falls: Observe safety instructions when lifting heavy loads.
- Regularly check the galvanised grating for corrosion and wear.
- Sump tray only suitable for flammable liquids of GHS categories 1-3 and liquids hazardous to water of GHS categories 1-4.
