Safety Instructions:

- Suitable for indoor use only.
- Beware of improper handling to avoid injury or damage.
- Only suitable for the storage of hazardous substances. When storing hazardous substances, observe the corresponding safety data sheets and storage instructions.
- Comply with safety regulations in accordance with TRGS 510. Ensure storage of hazardous substances in accordance with TRGS 510.
- Do not load beyond the recommended load capacity of the shelves: Shelves max. 75 kg, pull-out tray max. 25 kg.
- Before use, ensure that the cabinet is properly installed and secured to prevent it from tipping over.
- The cabinet must be installed on a firm and level surface. Level out any unevenness in the floor to ensure the stability of the cabinet.
- Carry out regular maintenance and inspections. Check the functionality of the door locks and seals. Carry out regular checks of the thermal cut-out.
- In the event of fire, the door closes automatically due to the integrated thermal release. If there is a risk of fire, do not manipulate the thermal release.
- Keep children away from the cabinet to avoid the risk of injury from improper use.
- Only allow authorised persons access to the storage contents. Use door locks to prevent unauthorised access.
- In the event of fire, only close the door if it is safe to do so. In the event of a fire, the safety storage cabinet must be closed immediately.
- Do not use for the storage of flammable liquids that are not suitable for this cabinet.
- Only use the cabinet in accordance with the manufacturer's instructions. Read the operating instructions carefully before use.
- Protect the cabinet from direct sunlight.
