### Safety Instructions:

- Safety cabinet is only suitable for the storage of authorised hazardous substances and must be used in accordance with TRGS 510.
- In the event of fire, the door closes automatically thanks to the integrated thermal release; do not allow the mechanisms to be blocked.
- Regularly check the locking system with profile cylinder and locking status indicator to prevent unauthorised access.
- Do not exceed the load capacity of the shelves (max. 75 kg) and the pull-out trays (max. 25 kg); do not place any heavy objects on the inner compartments.
- Ensure regular maintenance and inspection of the cabinet, including checking safety devices such as hinged door locks.
- Only trained personnel may use the cabinet to avoid injury.
- When transporting, use suitable lifting and transport equipment, take into account the weight of the cabinet (265 kg) and compensate for uneven floors with levelling devices.
- Maintain safe distances from combustible materials and ensure adequate ventilation when using the exhaust air connection.
- Follow the instructions for installation and use in accordance with the operating instructions to avoid the risk of fire due to improper use.
- Ensure the stability of the cabinet and avoid overloading.
