Article Numbers: 132162, 132161, 132160, 132159, 132158, 132157, 132156

Safety Instructions:

- To be used for the storage of water-polluting and toxic liquids in accordance with regulations.
- Only suitable for the storage of non-flammable liquids.
- Connect technical ventilation for optimum safety to prevent pressure build-up and hazardous vapours.
- Ensure correct handling and installation in accordance with the operating instructions to prevent tipping and improper use.
- Always keep the cabinet closed to prevent unauthorised access and unsafe contents.
- Observe safety regulations in accordance with national and local guidelines.
- Regular inspection of the tightness and condition of the cabinet is recommended; check immediately in the event of damage.
- Pay attention to the correct handling of toxic substances in order to minimise health risks; avoid the risk of suffocation and injury.
- Store securely to prevent access by children and only allow access to authorised personnel.
- Do not block natural ventilation and check the ventilation systems regularly.
- In the event of an accident, contact the manufacturer immediately and take appropriate measures.
- The cabinet is not suitable for use by children as it may contain hazardous substances.
