Safety Instructions:

- Suitable for the storage of water-polluting and non-flammable liquids and toxic substances, observe specific storage regulations.
- Protect the cabinet from children and only allow access by authorised persons.
- Avoid direct contact with aggressive substances to prevent damage.
- Carry out regular checks to ensure that the seals and safety mechanisms are intact.
- Ensure stable installation and do not exceed the load capacity.
- Technical ventilation should only be connected by qualified personnel. Ensure that the cabinet is properly ventilated to avoid hazardous vapours.
- Do not store any flammable liquids in the cupboard.
- Maintain the product regularly and carry out inspections for damage.
- Protect the cabinet from fire, direct heat and sunlight.
- Use suitable personal protective clothing when handling.
- Observe the safety and operating instructions supplied with the product and read them before use.
- Implement the necessary safeguards against unauthorised access, e.g. by using the cylinder lock.
- In the event of leaking containers, take immediate action in accordance with the applicable safety regulations.
