Please note the technical data of the products!

**Article Numbers:** 132134, 132133, 132132, 132131, 132130, 132129, 132128

### Safety Instructions:

- Suitable for water-polluting, non-flammable liquids and toxic substances. Operate and maintain the chemical cabinet in accordance with the applicable legal regulations.
- Protect the cabinet from direct sunlight, heat sources and damp conditions.
- Ensure optimum natural ventilation and do not block ventilation grilles, especially in the case of explosive or hazardous chemicals.
- Only use the vent connection with suitable technical ventilation and ensure correct installation.
- Check the product regularly for damage or wear and tear and carry out inspections.
- In the event of damage, take immediate measures to contain the risk and inform the relevant authorities.
- Prevent access by unauthorised persons and ensure that the cabinet is locked when not in use.
- Close hinged doors securely and do not force them open; keep hinged doors closed during use.
- Wear suitable personal protective equipment when working with hazardous materials.
- Only use the product with the intended safety shelves and in consideration of the maximum load capacity.
- Only use suitable agents for cleaning the cupboard and its interior fittings.
- Users should be familiar with the potential hazards of the stored substances.
- Read and follow all safety instructions carefully before using the product.
