Safety Instructions:

- Prevent access to toxic or hazardous liquids. Secure unauthorised access with a cylinder lock and ensure regular maintenance of the lock.
- Provide safety warnings for toxic contents. Consult the safety data sheet as the product may contain harmful chemicals.
- Ensure that the ventilation works to prevent the accumulation of vapours. Ventilation grilles must not be blocked and ventilation openings should be kept clear.
- Cabinet made of stable materials to avoid mechanical hazards. Carry out regular checks for structural integrity, cracks or corrosion.
- Enclose instructions for the safe handling and disposal of hazardous substances. Dispose of unneeded chemicals in accordance with local regulations.
- The cabinet may only be installed and used in accordance with the manufacturer's instructions to prevent injury from tipping over or structural damage.
- Product is suitable for the storage of water-polluting, non-flammable liquids and toxic substances in work areas in accordance with regulations. Improper use can result in health and environmental risks.
- Height-adjustable shelves must be stable and correctly positioned to prevent them from tipping over. Do not overload the cabinet.
- Use protective clothing, such as gloves and safety goggles, when handling the cabinet and its contents. Access should be denied to children and unauthorised persons.
- Only suitable for commercial use in work areas. Warn against use in areas with direct contact to food or drinking water.
- Regularly check for leaks or mechanical damage. Ensure watertightness when storing hazardous liquids.
- The product must be used in accordance with local regulations for the storage of hazardous substances.
