Safety Instructions:

- Store water-polluting and non-flammable liquids and toxic substances in accordance with regulations and observe specific regulations.
- Product is not suitable for children as the colour and description may be attractive; supervision recommended.
- Ensure access to ventilation grilles and clean regularly to ensure optimum air circulation; do not block the cabinet and connect to technical ventilation if necessary.
- Ensure that the cabinet is properly ventilated to avoid possible gas build-up and minimise safety risks.
- Check the chemical cabinet regularly for damage and carry out safety checks.
- Provide safety information in easy-to-understand language and observe all warnings.
- Use only for the intended purpose; do not store flammable substances.
- Use a cylinder lock and regularly check the cabinet for safe use.
- In the event of improper use, take protective measures such as personal protective equipment (PPE) to minimise health risks.
- Ensure proper disposal of chemicals that are no longer required or have expired.
- Do not overload the cabinet, observe the maximum load capacity of the shelves.
