Safety Instructions:

- Use for the storage of water-polluting, non-flammable liquids and toxic substances in working areas in accordance with regulations, not suitable for flammable or combustible substances.
- Make sure that the cabinet is securely locked to prevent unintentional access - use the cylinder lock in the rotary handle.
- Ensure that the cabinet is correctly connected to a technical ventilation system. Consult a specialist if you are unsure.
- Ensure regular inspection of the cabinet for damage and leaks.
- Wear suitable personal protective equipment when using the cabinet. Avoid contact with stored chemical substances and react immediately in the event of spillages.
- Ensure natural ventilation, e.g. through ventilation grilles or appropriate construction, to prevent the accumulation of vapours.
- Do not overload the cabinet and only load it with suitable weights to maintain stability.
- Keep out of the reach of children.
- High-quality textured coating protects against corrosion, do not use as a fire barrier as it is not fireproof.
- Observe all notes and safety instructions on the packaging and product inserts.
- Observe safety precautions when handling toxic substances.
- Observe the regulations for use in work areas and comply with the necessary technical precautions.
- Ensure that the cabinet is stable and protect it from moisture and direct sunlight.
- Clearly display safety instructions and warnings.
