

# Product Safety Information

## Floor grate Yoga Rost®, plates, 11 pieces

**Manufacturer/Responsible Person:** Miltex GmbH, Ohmstraße 2, 68519 Viernheim, Deutschland

**E-Mail:** info@miltex.de

Please note the technical data of the products!

**Article Numbers:** 46865, 46864, 46863, 46862, 46861

### Safety Instructions:

- Note slip resistance; slip resistance may decrease in wet conditions. Caution: Risk of slipping when wet. Avoid walking on the floor grating when it is wet to minimise the risk of slipping accidents.
- Avoid tripping hazards when laying the tiles. There is a risk of tripping if used incorrectly.
- Do not use in water-rich areas if drainage is insufficient. For use in changing rooms and showers, ensure adequate drainage to prevent water accumulation and the risk of slipping.
- Make sure that the tiles are laid on a stable and level surface to prevent deformation. Ensure that the floor grating is laid on a suitable and stable surface.
- Check the integrity of the panels regularly and replace damaged parts immediately. When used outdoors, the floor grating should be checked regularly for damage to avoid hazards.
- Not suitable for extremely high temperatures as the material could melt.
- Avoid contact with sharp objects to prevent damage. Avoid using sharp or extremely heavy objects on the floor grille.
- Only use for the intended area of application (indoors and outdoors).
- Maintain the required safety distances from combustible materials.
- For heavier loads (over 22,000 kg/sqm), the stability of the base must be checked to prevent the risk of collapse.
- Non-touchable sales areas should be available to minimise the risk of slipping accidents.
- The panels must not be used in areas where they are in constant contact with water and chemical substances unless they have been officially tested for this.
- Use in combination with other materials may affect the slip behaviour, make sure that the combination is safe.
