Article Numbers: 46875, 46874, 46873, 46872, 46871

Safety Instructions:

- Only use the product on non-slip, level and stable surfaces to minimise the risk of slipping.
- The tiles should be laid correctly to avoid tripping and slipping hazards.
- Regular cleaning and inspection of the tiles is recommended, especially in extreme weather conditions, to ensure slip resistance.
- Suitable for indoor and outdoor use; however, not suitable for extreme temperatures or prolonged exposure to UV radiation.
- Do not overload: Observe maximum load capacity of 65,000 kg/sqm.
- Do not use the panels in wet areas without suitable safety measures if there is no non-slip surface.
- Suitable precautions for use in damp rooms, as the boards provide a non-slip surface.
- Check that the drainage is not blocked to avoid the risk of slipping.
- Protect the product from direct heat sources, high temperatures and open flames to avoid material changes.
- Not suitable for children under 3 years of age due to choking hazard from small parts; children should generally be supervised.
- The product is intended for its intended use and should not be used by children without supervision.
