Article Numbers: 46175, 46168

Safety Instructions:

- Make sure that the lockers are not overloaded to avoid stability problems and that the weight is evenly distributed on the shelves.
- Avoid storing heavy and sharp-edged material on the hat shelves and clothes rail.
- Ensure that the lockers are used in dry environments to prevent corrosion of the stainless steel, unless they are specifically designed for humid environments.
- Cleaning agents should be used with caution so as not to impair the surface quality.
- The use of gloves is recommended to avoid skin damage when coming into contact with sharp edges or corners.
- Security features such as the cylinder lock should be checked regularly to ensure they are working properly.
- Provide clear instructions for the safe use and maintenance of the product.
