Safety Instructions:

- Not suitable for children: This product is not designed for use by children.
- Observe the safety instructions for use in damp environments: The stainless steel locker is suitable for use in damp environments, but all electrical elements should not come into contact with water and should be checked regularly for corrosion.
- Observe the maximum load: Do not overload the shelves to avoid tipping or other safety risks.
- Secure anchoring: Make sure that the locker is securely anchored to ensure stability.
- Follow the maintenance instructions: Regular inspections and maintenance are important to ensure safety and functionality.
- Be aware of the risk of crushing fingers when closing the locker doors.
- The product must not be modified improperly in order to avoid safety risks.
- In accordance with the general safety requirements, it must be ensured that the product is used in accordance with the intended specifications.
