Safety Instructions:

- Make sure that the doors are properly closed and check the door and locking mechanisms regularly to ensure that they are working properly.
- Ensure correct assembly and stability to prevent the locker from tipping over; the locker must be stable and on a level surface.
- Sharp edges require caution during handling, transport and assembly to avoid injury.
- The product is not suitable for children and vulnerable persons and must be placed out of their reach.
- Read and follow the installation instructions carefully to avoid mistakes.
- Make sure that small parts cannot be swallowed to avoid the risk of choking.
- Use the security twist lock system and suitable padlocks correctly to prevent unauthorised access.
- Do not overload the cabinet to ensure stability and avoid structural damage.
- Ensure that the plinth is stable, especially when adjusting or moving it, to avoid the risk of falling.
- Avoid aggressive chemicals when cleaning to prevent damage.
- Check regularly for damage or wear and tear and, if necessary, take defective parts out of service or replace them.
- Ensure that the cylinder lock is used correctly to prevent unauthorised access.
- Use the floor leveller on uneven surfaces to avoid the risk of falling.
- The ventilation slots should not be blocked to ensure adequate ventilation.
- The product weight of 64.5 kg requires caution when transporting and setting up in a stable location.
