Article Numbers: 174039, 174035, 174034

Safety Instructions:

- Only use in dry rooms.
- Power strips are not toys; keep out of reach of children. Keep the product out of the reach of small children. Please confirm that the child protection functions correctly and that the socket outlets are childproof.
- Do not overload the multiple socket outlet with more watts than specified. Avoid overloading the power strip to prevent the risk of fire. Do not use any devices that exceed the maximum load capacity of the multiple socket outlet.
- Ensure that the multiple socket outlets do not come into contact with water or other liquids. Keep the power strip away from water and other liquids.
- Check the cable regularly for damage and do not use it if it is damaged. Do not use the multiple socket outlet if the connection cable is damaged or cracked.
- Switch off the power strip when it is not in use.
- Only use in conjunction with electrical appliances that are authorised for use in the EU.
- Do not use the product in excessively damp conditions or near water. The multiple socket outlet is not suitable for outdoor use.
- Before use, check that the connection cable and sockets are in perfect condition.
- The safety switch should be checked for proper functioning before each use. Ensure that the safety switch is working properly before using the multiple socket outlet.
- To reduce the risk of electric shock, never touch the socket outlet with wet hands.
- Risk of suffocation due to improper use of the multiple socket outlet, especially if small parts are defective or loose.
- Risk of electric shock due to improper connection or misuse.
- Take care when using angle inserts that may not be compatible.
