Safety Instructions:

- Electrical products can be dangerous if handled incorrectly. Read the safety instructions before commissioning.
- Ensure that the total load does not exceed the maximum permissible power of 3000 watts. Only use socket strips for the intended maximum power and do not overload them.
- Only use the multiple socket outlet in dry indoor areas and keep it away from water and other liquids to avoid electric shocks.
- The sockets are equipped with child protection, but children should be closely supervised and caution: Possible choking hazard due to small parts. Keep out of reach of children.
- Regularly check cables and plugs for damage and remove damaged cables to avoid electrical hazards.
- The socket strip contains a safety switch which should always be switched to the OFF position when the strip is not in use.
