Safety Instructions:

- Avoid using the product near sharp edges or heavy objects to prevent injury.
- Always use two people when handling to avoid injuries from falling or overloading.
- Close the transport container properly to prevent the contents from falling out.
- Do not load containers above their maximum stacking heights and ensure that the stacking edge lock is correctly engaged when stacking to prevent injuries.
- Close the hinged latches properly to prevent unintentional opening during transport, as they may come loose.
- Boxes may not be suitable for children and should therefore be kept out of their reach to avoid injury.
- Do not load the container above the permitted weight to prevent it from tipping over or breaking.
- Ensure tight-fitting lids with all-round rubber seals to protect the contents from external influences.
- Do not store containers near open flames or extreme temperatures.
- Before use, ensure that the container is undamaged and stable on uneven or slippery surfaces to prevent it from tipping over.
- Stow heavy objects securely and use suitable carrying handles to avoid injury.
- Protect from direct sunlight and humid environments to avoid material distortion.
- Ensure that small children do not play with the containers to avoid injury.
