

Product Safety Information

Treston drawers, ESD version

Manufacturer/Responsible Person: Treston Deutschland GmbH, Friedrich-Ebert-Damm 143, 22047 Hamburg, Deutschland

E-Mail: info.de@treston.com

Please note the technical data of the products!

Article Numbers: 90068, 90067, 90002

Safety Instructions:

- Drawers made of conductive polypropylene can protect against electric shocks if handled incorrectly. Ensure that the drawers are correctly earthed to avoid electrostatic discharge.
- The drawers are not suitable for children. They contain small parts and are not intended for playing with. Keep them out of the reach of children.
- Not suitable for outdoor use as this may affect the service life and functionality.
- Application temperature range of the drawers: -20 °C to +80 °C. Do not exceed the recommended temperature limit of +80 °C to avoid material deformation and damage.
- Labels are not included in the scope of delivery and must be ordered separately. Use the correct labels to avoid confusion.
- Pay attention to electrostatics during use to avoid damage to sensitive components.
- Ensure that the drawers are properly mounted on shelving systems to avoid the risk of falling. Only use compatible shelving systems to avoid instability.
- Avoid storing heavy objects on the drawers to prevent breakage or deformation.
