Safety Instructions:

- Make sure that the display case is stable to prevent it from tipping over.
- The display case should be installed in a dry area to prevent damage caused by moisture.
- Avoid overloading the adjustable shelves with heavy objects to prevent them from breaking.
- Follow the assembly instructions carefully to ensure that the cabinet is assembled correctly.
- The low-voltage lighting may only be used with the recommended wattages to avoid overheating.
- Check the safety locks regularly to ensure that they are in working order.
