Safety Instructions:

- Note the high load capacity of up to 500 kg and do not exceed this.
- Avoid using the shelf trolley on uneven or slippery surfaces.
- Ensure that the castors are working properly before moving the trolley.
- If the shelves are suspended at an angle, a maximum inclination of 30 degrees is permitted.
- The floor load must not exceed 80 kg per floor and must be evenly distributed to prevent damage.
- Make sure that the trolley is not overloaded to prevent it from tipping over.
- Keep away from rain or other wet conditions to avoid the risk of slipping.
- Make sure that the shelves are correctly hooked in to prevent them from tipping over.
- Avoid tilting the trolley excessively by more than 30 degrees.
- Secure the swivel castors with the brakes when the trolley is not being moved.
- Please note that there is a risk of injury if used incorrectly.
