Safety Instructions:

- The workbench is designed for processing heavy workpieces. There is a risk of injury from collisions or crushing if used incorrectly.
- Use of the workbench only recommended with suitable protective equipment (gloves, safety goggles).
- The work surface is impregnated against splash water, oil and grease. Nevertheless, corrective measures should be taken to minimise the risk of workpieces slipping.
- The maximum load of 500 kg must not be exceeded in order to avoid structural damage or the risk of falling.
- The workbench may only be used for its intended purpose.
- Lift and transport heavy objects properly to avoid injury.
- The workbench must not be set up unstably to prevent it from tipping over.
