Safety Instructions:

- Maximum load on the workbench: 500 kg to prevent overloading, structural damage and injury.
- Load drawers with a maximum of 80 kg to avoid overloading.
- Ensure that all parts of the workbench are properly assembled and secure to avoid accidents.
- Only use the workbench in accordance with the instructions to avoid injury.
- Ensure that heavy tools are handled and stored correctly to prevent injuries.
- Ensure sufficient stability and a level surface to prevent the workbench from tipping over.
- Avoid working near liquids to minimise the risk of slipping.
- Do not use the workbench in damp or wet environments to ensure durability and avoid electrical hazards.
- Do not allow children access to the workbench to prevent injuries caused by improper use.
