### Safety Instructions:

- Avoid placing excessive loads on the lockers and storing heavy or unstable objects on the surfaces to prevent them from tipping over.
- Ensure that the lockers are on a stable surface and securely positioned to prevent them from tipping over.
- Maintain and check the locks regularly to ensure that they are working properly.
- Make sure that no sharp objects are used on the doors or inside the lockers to avoid injury.
- Only use the lockers for their intended purpose and in accordance with the manufacturer's instructions.
- Ensure that the locker is regularly checked for damage and rust, especially in a damp environment.
- The manufacturer's instructions must be observed for installation and use in order to avoid hazards.
