Please note the technical data of the products!

Article Numbers: 37669, 37668

Safety Instructions:

- The bollard must be securely set in concrete or firmly anchored to the intended surface to prevent accidents.
- Avoid using damaged or deformed bollards as they do not provide the required stability.
- Always handle the bollard with care to avoid injury, especially when lifting and transporting it.
- Wear suitable protective equipment (e.g. gloves and safety shoes) when installing and handling the bollard.
- The local building regulations and safety guidelines must be observed during installation.
- Ensure a stable surface during installation.
- The product is heavy; use suitable lifting and transport equipment.
- Ensure secure assembly and locking to guarantee stability.
- No direct contact with the product during operation.
