Safety Instructions:

- Make sure that the box is not overloaded to ensure stability during transport.
- Avoid sharp objects that could damage the box and injure your fingers.
- The box should not be stored near sources of heat or naked flames.
- The light metal box can be dented or scratched by mechanical stress, so use suitable protective measures.
- Dispose of the box in accordance with local regulations for metal waste.
- Do not leave the product in the hands of children as it is used as a transport container.
- When using as an open box, be aware of the possibility of tipping over and the risk of injury.
- Ensure that the lever locks are properly operated to prevent sudden opening during transport.
- Provide clear operating instructions and safety instructions to prevent improper use.
