Safety Instructions:

- Tall objects can fall if they are not stacked properly.
- Do not overload the box to avoid structural damage or breakage.
- The box may have sharp edges if handled incorrectly.
- Keep the box off the floor when wet to prevent corrosion.
- The lid must be properly locked to prevent unintentional opening.
- Make sure that the box is protected from sharp edges or impacts to avoid injury.
- Only use the box for the intended transport purposes in order to avoid damage.
- Keep the box out of the reach of children to avoid improper use and possible dangers.
- The box must be properly closed during transport to prevent the contents from falling out.
