Please note the technical data of the products!

Article Numbers: 154791, 154790, 154789, 154788

Safety Instructions:

- Make sure that the scissor roller tracks are regularly checked for stability and safety to ensure that they function properly.
- Ensure that the load capacity of 100 kg is not exceeded to avoid accidents and structural problems.
- Avoid overloading the tracks and improper installation to prevent injuries.
- Make sure that all distances between the castors and the height of 700 - 1100 mm comply with the specifications to ensure stability and prevent toppling over.
- Use suitable protective equipment when moving the systems to avoid injury.
- Only use the castors on level surfaces and in accordance with the instructions to ensure safe travelling and positioning and to prevent tipping.
- Be aware of the possible risk of injury from crushing parts when handling the roller conveyors.
- Check the stability of the supports and correct assembly before use.
- The roller conveyors must be used on a level surface to prevent them from tipping over.
- Only use the roller conveyors in combination with suitable conveyor technology and observe the relevant instructions.
- Children may only use the roller conveyors under the supervision of an adult.
- Ensure that personnel are instructed in the safe use and handling of the roller conveyors.
- Avoid using the roller conveyors in damp or wet environments to minimise the risk of slipping.
- Avoid inaccessibility of moving parts during operation.
- Ensure that safety instructions are provided in understandable language.
