Safety Instructions:

- Choking hazard due to possible improper use of the product.
- Risk of injury due to improper handling of heavy loads (load capacity: 800 kg).
- Risk of slipping when moving the boxes on smooth floors.
- The product is not suitable for use by children.
- Ensure that the boxes are stable when stacked to prevent them from tipping over.
- Caution when transporting heavy loads: The maximum load is 800 kg; excessive loads can lead to injuries.
- Caution when stacking: Stack a maximum of three boxes on top of each other to ensure stability and prevent them from tipping over.
- Risk of injury due to use on uneven floors; ensure that the surface is level and stable.
- All users must be familiar with the handling instructions in order to avoid accidents.
- Provide public safety instructions for proper use and maintenance.
- Ensure that the Allround Box is not used by children to avoid the risk of injury.
- Use on slippery or uneven surfaces could increase the risk of tipping over. Caution is advised.
- The box should not be stacked higher than three high to minimise the risk of falling.
- Inform users about the correct use of the wheel alignment locks in order to avoid moving accidents.
- Regularly check the integrity of the wheel fixings and frame construction for safe use.
- When the box is stacked, secure the top box to prevent it from tipping over.
- Only use the box on a suitable floor to minimise the risk of tripping.
- Keep children away from the appliance to avoid the risk of injury.
- Improper use may result in injury.
