

# Product Safety Information

## Scissor roller conveyors, track width 400 mm

**Manufacturer/Responsible Person:** Blume-Rollen GmbH, Röntgenstr. 1-3, 42477 Radevormwald, Deutschland

**E-Mail:** info@blume-rollen.de

Please note the technical data of the products!

**Article Numbers:** 154795, 154794, 154793, 154792

### Safety Instructions:

- Do not exceed maximum load capacity: 100 kg, check load capacity before use.
- Keep the work area free of obstacles to avoid tripping accidents.
- Operate the roller conveyors on a stable, level surface to prevent them from tipping over.
- Keep people away from moving parts, do not allow children to play in the vicinity.
- Carry out regular maintenance checks to ensure that the components are functioning properly and check for mechanical damage.
- Take precautions on uneven floors to prevent tipping and swaying, mount supports properly, secure height adjustment.
- Wear eye and hand protection during assembly and disassembly, keep small parts out of the reach of children.
- Take particular care when using near electricity or water due to the risk of electric shock.
- If necessary, secure the roller conveyors to prevent them from rolling away accidentally.
