

Product Safety Information

Scissor roll webs, web width 400 mm

Manufacturer/Responsible Person: Blume-Rollen GmbH, Röntgenstr. 1-3, 42477 Radevormwald, Deutschland

E-Mail: info@blume-rollen.de

Please note the technical data of the products!

Article Numbers: 154811, 154810, 154809, 154808

Safety Instructions:

- Max. Load capacity: Do not exceed 100 kg.
- Ensure that the roller conveyor is stable and on a level surface to prevent it from tipping over.
- High risk in case of improper use, especially when adjusting the installation height and variable location setting.
- Before use, ensure the stability of the supports and use suitable materials.
- No persons in the danger zone when the product is in motion.
- Wear personal protective equipment during use.
- Use the product out of the reach of children. Only allow children to use the product under adult supervision.
- Use carefully around bends to avoid derailing the tracks.
- Note to avoid crushing of moving parts or during transport.
- Reporting of incidents to improve product safety.
- Mark maximum installation height correctly: 700-1100 mm.
- Be aware of potential hazards when using with other conveyor systems.
- Use protective devices in the vicinity of the roller conveyor to protect against injuries.
- Only use suitable levelling mechanisms for height adjustment.
- Read the instructions for use and safety information before use.
- Take care with sharp edges to avoid injury.
- Insufficient load distribution can cause tipping.
