Article Numbers: 154815, 154814, 154813, 154812

Safety Instructions:

- Only authorised for use in commercial applications.
- Before use, ensure that the castors are correctly fitted.
- Users should wear suitable personal protective equipment to avoid injury.
- The load capacity of 120 kg must not be exceeded.
- Ensure even and stable surfaces for transport and storage.
- When adjusting the installation height, ensure that all supports are correctly fixed.
- The product must not be used near water or in areas with high humidity.
- Ensure that the structure is stable to prevent it from tipping over.
- Only use on a level and firm surface to ensure stability.
- Pay attention to fingers and other parts of the body when using to avoid injury.
- The scissor roller tracks are not suitable for children and may only be used by trained personnel.
- Check the adjustment mechanisms for safe operation before use.
- When using in curves, ensure that the load is evenly distributed.
- Users should check the structures before use and ensure that they are correctly assembled.
- Risk of suffocation from small parts if used incorrectly.
- Risk of injury due to improper handling and insufficient stability if incorrectly installed.
- Only suitable for use by qualified personnel.
- Ensure that the device is used on firm, stable surfaces.
